

# Ensure Food Safety with Automated Hygiene Equipment

Standardize employee hygiene across shifts and facility locations to ensure product safety with full-automated employee hygiene technology that removes more than 99% of pathogens in half the time and using less water than traditional hand and footwear hygiene methods.

### Effective

Clinically proven to remove more than 99.9% of harmful pathogens with each 12-second hand wash.

### Easy to Use

Standardizes hygiene making training, compliance monitoring and documentation effortless across production zones.

### Eco-Friendly

Cuts handwashing time in half using less water than traditional methods while maximizing energy efficiency.

## Trusted by food safety leaders to improve hygiene compliance

"You stick your hands in and it does all the work for you!

The easier you make it, the more fun it is, your employees are going to follow that. That's been really great for us."

Ahsha Abu-Ali  
Director, Food Safety at HelloFresh

# CleanTech® EVO

## Automated Handwashing Stations

The latest evolution of Meritech CleanTech® Automated Hand Washing Stations, EVO uses intuitive sensors, recyclable solution cartridges and an engaging touchscreen display to help create the perfect hand washing experience that:

- Remove more than 99.9% of pathogens in 12 seconds
- Cuts handwashing time in half and uses less water than sinks
- Standardizes hygiene across shifts and locations
- Streamlines SOPs and improves compliance tracking.
- Has no touch points or cross-contamination between users

### EVO One

Single station free standing system

### EVO Wall

wall mounted single station system

### EVO In-Counter

system that fits into any counter top

### EVO Three

Triple station free standing system

# UltraPure

The perfect hygiene solution for the perfect hand wash

We knew that standard industrial hand soaps wouldn't cut it in our quest to ensure the perfect hand wash. That's why we developed UltraPure specifically for CleanTech®

# Automated Boot Scrubbers

### XBW High-Throughput

Configurations:

- Soles-only
- 3-inch brush

### MBW Compact Design

Configurations:

- Soles-only
- 3-inch brush
- 9-inch brush

- Automatically maintain necessary chemical concentration
- Have an easy to clean design for both compact and high-throughput stations
- Accommodate a variety of footwear with a variety of brush heights
- Ensure more than 99% of pathogen removal for food safety
- Are made in the U.S.A with service support based around America

# Enhance Your Hygiene Zone

## Simultaneous Footwear Hygiene

Achieve more than 99% of pathogen removal from footwear during a 12-second CleanTech® hand wash

### Automated Boot Dip

Automatically maintains regulatory recommended PPM

### Sole Clean Sanitizing Pan

Evaporates quickly post-application for dry production areas.

## Complete Control

Ensure employees compliance with CleanTech®'s controlled access turnstile

### Controlled-Access Turnstile

Compatible with the EVO One station. Turnstile does not permit entrance to production areas until full automated hand wash is complete.

- ✓ Concentrated solution comes in smaller containers that take up less storage space
- ✓ Smart cartridges work with the system to notify users about refills and reordering
- ✓ Extensively tested to ensure more than 99.9% pathogen removal when used with CleanTech®
- ✓ Protects the integrity of the CleanTech® Handwashing Station
- ✓ Added moisturizers protect skin health

## Manufactured in Colorado

All of our automated hygiene equipment is manufactured and quickly shipped right from our headquarters in Golden, CO.
